ON THE CONVEXITY OF CERTAIN INTEGRAL OPERATORS

VASILE MARIUS MACARIE\(^1\)\(^*\) AND DANIEL BREAZ\(^2\)

Communicated by K. Gurlebeck

Abstract. In this paper we consider the classes of starlike functions of order \(\alpha\), convex functions of order \(\alpha\) and we study the convexity and \(\alpha\)-order convexity for some general integral operators. Several corollaries of the main results are also considered.
