Publications of Ron L. Graham

Preprints
3. Minimum perimeter rectangles that enclose congruent non-overlapping circles, (with B.D. Lubachevsky).
5. Products of universal cycles, (with P. Diaconis).
10. On minimal colorings without monochromatic solutions to a linear equation, (with B. Alexeev and J. Fox), to appear in Integers.
15. On the growth of a van der Waerden-like function.
16. How to play the majority game with liars, (with S. Butler and J. Mao).

1999

1998

1997

1996

1995
1994

1993

1992

1991

1990
6. Ramsey Theory, (with Joel H. Spencer), Scientific American 262 no. 7 (1990), 112-117.

1985
7. On the History of the Minimum Spanning Tree Problem, (with P. Hell), Annals Hist. of Comp. 7 (1985), 43-57.
10. Classes of Interval Graphs under Expanding Length Restrictions, (with P.C. Fishburn), Jour. Graph Th. 9 (1985) 459-472.

1984

1983
4. Euclidean Ramsey Theorems on the n-Sphere, Jour. Graph Theory 7 (1983), 105-114.

1982

1981
1980
1. Information Bounds are Weak in the Shortest Distance Problem, (with A.C. Yao and F.F. Yao), Jour. A.C.M. 27 (1980), 428-444.

1979
4. On Properties of a Well-Known Graph or What is Your Ramsey Number?, (with T. Odda), Annals N.Y. Acad. Sci. 328 (1979), 166-172.

1978

1977

1976

5. On the Set of Distances Determined by the Union of Arithmetic Progressions, (with F.R.K. Chung), Ars Comb. 1 (1976), 57-76.

1975

3. On the Prime Factor of $\binom{\left\lfloor n \right\rfloor}{\left\lfloor \frac{n}{2} \right\rfloor}$, (with P. Erdos), Jour. Comb. Theory (A) 21 (1975), 257-298.

1974

1973

1972

1. On a Linear Diophantine Problem of Frobenius, (with P. Erdos), Acta Arithmetica 21 (1972), 399-408.
1971

1970
2. Note on a Nonlinear Recurrence Related to \( \sqrt{2} \), (with H.O. Pollak), Math. Mag. 43 (1970), 143-145.

1969

1968
1967

1966

1965

1964
5. A Property of Fibonacci Numbers, Fib. Quart. 2 (1964), 1-10.

1963

Patents

Profiles
5. The Eureka Moment, (written by J.R. Goldberg), Science Digest, January 1985, 64-65, 81.
10. A "hands-on" approach to mathematics, (written by P. Orel), Rutgers Focus, September 30, 1994, 3.
11. Math in motion, (written by J. McGrady), Vanguard (student newspaper for Portland State University), May 19, 2006, pps. 1, 3.

Miscellaneous
8. Mystery tiles at Murray Hill, (written by M. Gardner), Puzzles from Other Worlds, Vintage Books, New York, 1984, 29-32. (Note: this is a quasi-fictional work, so Graham's tile has not yet been discovered.)
9. Ron Graham Celebration: A Magical Day, pertains to the end of Ron's career at Bell Labs, includes biographical sketch by L. Rabiner.
10. A brief survey of combinatorics, (written with P. Frankl), unpublished manuscript. [Originally written to be included as an article in the 1992 Encyclopeida Britannica. Missing page 35.]
11. The Odd Couple, (written by C. Merow), from PCTM Magazine.
14. Keeping them up in the air, (written by M. Wellemeyer), FORTUNE, December 17, 1979, 25-26,30,32.
