

SUMMARY

Papers on Mathematics

- C. Anghel – *Quantum sheaf cohomology on surfaces of general type I: construction of stable omalous bundles* 9
- R. Bucur, D. Breaz – *Univalence conditions for a new general integral operator* .17
- I. Chițescu – *Non additive (fuzzy) measures. Non linear (fuzzy) integrals* 27
- P. Dicu, R. Diaconu – *Preserving properties and estimation of the coefficients for functions that belong to the subclass of analytic functions* 51
- A. Alb Lupaș – *On some differential sandwich theorems using a multiplier transformation and Ruscheweyh derivative* 61
- C.L. Mihiț, R. Lolea – *Lyapunov functions for trichotomy with different growth rates* 77
- I. Mihoc, C.I. Fătu – *On some probabilistic and informational characterizations of the Weibull distribution* 95
- Á.O. Páll-Szabó, O. Engel – *Certain class of analytic functions with varying arguments defined by Sălăgean derivative* 113
- I. Valușescu – *Stationary dilation of a nonstationary Γ -correlated process* 121
- D. Wainberg, M. Aldea, L. Căbulea – *Some properties of an integral operator* 135

Papers on Computer Science

- B.D. Bucur – *Several remarks on generating a theoretical model of modal logic* 141
- A.M. Coroiu – *Partitional clustering methods with ordinal data* 147
- A. Garrido – *The challenges of AI* 155

M. Muntean, H. Vălean, L. Căbulea – <i>Feature selection methods for multidimensional datasets</i>	167
C. Rotar – <i>Directed evolution - a bio-inspired optimization technique</i>	179
I. Tulbure, M.F. Jischa – <i>Fuzzy logic based approach for environmental impact assessment</i>	195
